**The Grill Friends™ Glow-in-the Dark Instant-Read Thermometer**  
***With Easy-to-Follow-Temperature Guidelines***

The Grill Friends™ Glow-in-the Dark Instant-Read Thermometer with *bonus* Temperature Guideline Magnet solves many challenges that home cooks have. The large 2-inch face and the glow-in-the dark background make it easy to read once the sun has gone down. The thermometer is NSF approved and the stem is manufactured from premium-grade stainless steel. But, most importantly, is an easy-to-follow temperature guideline that you don't see on other thermometers.

“I've simplified what you need to know about testing for doneness in 5 easy end-temperatures,” says Karmel. “This will give you a small reference point for the most commonly cooked meat and poultry.” For example, if you know that medium rare for most meat is 145°F then you don't have to memorize whole charts for beef, lamb and veal, you remember that 145°F is medium rare. Karmel deferred to the USDA when setting the recommended *food-safe* end temperatures—if you prefer to cook your meat and poultry to a higher or lower end temperature, that is personal preference. The 5 end-temperatures are marked on the face, the handy pocket case and on a *bonus* magnet that is a quick reference for the temperature guidelines. Place the magnet on the fridge or the grill for easy reference.

The Grill Friends™ Glow-in-the Dark Instant-Read Thermometer is packed in the BBQ to Go Kit and sold separately open-stock in a blister-pack card with the bonus Temperature Guideline magnet for \$6.00. The Instant-Read Thermometer is available nationally at kitchen, gourmet and housewares stores, in mail-order catalogs and online at [www.BBQPROSHOP.com](http://www.BBQPROSHOP.com).
